Almond Amaretto Gelato

Makes 6 servings

4 cups heavy cream

5 egg yolks

1 cup granulated sugar

1 cup crushed blanched almonds

1 tablespoon Amaretto liqueur

Pour the cream into a saucepan and heat gently.

Beat the egg yolks and sugar together until pale and creamy. Beat 2 tablespoons of the hot cream into the egg mixture, then beat in the remaining cream, a half cup at a time.

Pour into a double boiler, or into a bowl set over a pan of simmering water, and cook over a gentle heat, stirring constantly 15 to 20 minutes, until the mixture coats the back of a spoon. Cool mixture, then chill.

Pour chilled mixture into an ice cream maker and churn according to manufacturer's instructions. While the paddle is churning, add the almonds and Amaretto, freeze gelato overnight. Place in the refrigerator about 20 minutes before serving.

Almond Ice Cream

1/4 cup blanched almonds
2 cups whole milk
3/4 cup heavy cream
3 egg yolks
1/2 cup superfine sugar
1 teaspoon kirsch

Pound the almond into paste. Add milk and heavy cream, mix thoroughly together. In a saucepan, heat the almond mixture to a boil. Remove from heat.

In a bowl, mix egg yolks, sugar and kirsch for 5 minutes. Add almond milk and mix well with wooden spoon. Heat the mixture over low heat for 5 minutes without letting it boil. Stir continuously. Then allow it to cool. Strain through a sieve into ice cream maker and freeze until the ice cream is thoroughly firm.

Amaretto Peach Ice Cream

1 1/2 pounds peaches, peeled, pitted, sliced
1 cup granulated sugar
2 tablespoons fresh lemon juice
1 cup crumbled amaretti cookies
3 tablespoons Amaretto
6 large egg yolks
2 teaspoons vanilla extract
2 cups well-chilled heavy cream

In a bowl toss peaches with 1/4 cup sugar and lemon juice and let mixture stand 30 minutes. Drain mixture and purée peaches in a food processor.

In heavy saucepan combine remaining 3/4 cup sugar with 1/4 cup water, bring mixture to a boil over moderate heat, washing down the sides of pan with a pastry brush dipped in cold water, and simmer the syrup until it is a pale golden caramel. Add 1/2 cup boiling water carefully (mixture will bubble vigorously) and simmer mixture, stirring, until caramel is dissolved.

In a small bowl sprinkle the cookies with Amaretto and let stand for 5 minutes.

In a large bowl with electric mixer beat egg yolks until they are thick and pale, add syrup in a stream, beating, and beat mixture until cool. Stir in vanilla extract, peach purée, cookie mixture and cream. Freeze the mixture in an ice cream maker according to the manufacturer's directions.

Makes about 2 quarts.

Apple–Cheese Ice Cream

5 cooking apples, peeled and cored
2 cups cottage cheese, divided
1 cup half–and–half, divided
1/2 cup apple butter, divided
1/2 cup granulated sugar, divided
1/2 teaspoon ground cinnamon
1/4 teaspoon ground cloves
2 eggs

Chop apples into 1/4–inch dice; set aside.

In blender or food processor, combine 1 cup cottage cheese, 1/2 cup half–and–half, 1/4 cup apple butter, 1/4 cup sugar, cinnamon, cloves and one egg. Blend until smooth. Pour into a large bowl.

Repeat with remaining cottage cheese, half and half, apple butter and egg. Combine with previously pureed mixture. Stir in chopped apples. Pour into ice cream canister. Freeze in ice cream maker according to manufacturer's directions.

Makes 2 quarts.

Apricot Earl Grey Ice Cream

1 cup (about 6 ounces) dried apricots
1/3 cup plus 2 tablespoons granulated sugar
2/3 cup water
1 1/2 cups milk
2 tablespoons Earl Grey tea leaves
1 1/2 cups heavy cream
Pinch of salt
4 egg yolks
1 tablespoon apricot brandy or orange liqueur

In a small heavy saucepan, combine the apricots, 2 tablespoons of the sugar and water. Bring to a boil over moderate heat. Reduce the heat to moderately low and simmer, uncovered, until the apricots are tender, 10 to 12 minutes.

Transfer the apricots and any remaining liquid to a food processor and puree until smooth, scraping down the sides of the bowl once or twice. Set aside.

In a heavy medium saucepan, combine the milk and tea leaves. Warm over low heat until the milk is hot. Remove from the heat and let steep for 5 minutes. Strain the milk through a fine-meshed strainer.

Return the milk to the saucepan and add the heavy cream, remaining 1/3 cup sugar and salt. Cook over moderate heat, stirring frequently with a wooden spoon, until the sugar is completely dissolved and the mixture is hot, 5 to 6 minutes. Remove from the heat.

In a medium bowl, whisk the egg yolks until blended. Gradually whisk in one-third of the hot cream in a thin stream, then whisk the mixture back into the remaining cream in the saucepan.

Cook over moderately low heat, stirring constantly, until the custard lightly coats the back of the spoon, 5 to 7 minutes; do not let boil.

Immediately remove from the heat and strain the custard into a medium bowl. Set the bowl in a larger bowl of ice and water. Let the custard cool to room temperature, stirring occasionally.

Whisk in the reserved apricot puree and the brandy until blended. Cover and refrigerate until cold, at least 6 hours or overnight.

Pour the custard into an ice cream maker and freeze according to the manufacturer's instructions.

Return to the rinsed pan and cook over low heat, stirring constantly, until thickened. Set aside to cool, stirring occasionally.

Remove the flesh from the avocados and purée with the orange zest and juice and put in a bowl. Beat in the cooled custard and fold in the whipped cream. Spoon into a container, cover and freeze until just becoming firm. Beat well in a bowl. Whip the egg whites until stiff but not dry and fold into the avocado mixture. Caramel Ice Cream

1/2 cup granulated sugar

3/4 cup evaporated milk

In a heavy-based saucepan, dissolve sugar in 2/3 cup water and cook over low heat until it turns a rich golden brown. Remove from heat and gradually stir in another 2/3 cup water. Cover your hand while doing this, as the caramel splatters. Return the pan to the heat and stir until the caramel has dissolved.

About 30 minutes before serving, transfer the ice cream to the refrigerator.

Cardamom Ice Cream

1 cup plus 2 tablespoons half-and-half
6 large egg yolks
5 1/2 tablespoons granulated sugar
1 cup whipping cream
5 1/2 tablespoons granulated sugar
1 whole vanilla bean, split down the center
1 rounded teaspoon freshly ground cardamom

In small heavy-bottomed saucepan slowly bring half-and-half to boil. Place in refrigerator overnight, or chill in freezer briefly but do not freeze.

Cream egg yolks and 5 1/2 tablespoons sugar; set aside.

In 2-quart saucepan combine whipping cream, remaining sugar and vanilla bean and slowly bring to a boil, stirring frequently. Remove bean; using point of paring knife, scrape vanilla grains from inside hull. With fingers, rub off any cream or remaining vanilla grains and mix into cream. Return the cleaned vanilla pods to the cream. Add the cardamom.

Add about 1/3 of the cream mixture to yolks, whisking constantly. Pour this mixture into saucepan, whisking constantly, and bring to just under boiling point. Remove from heat. Immediately place pan in cold water or over ice to stop cooking. Stir frequently until cool.

Beat in chilled half-and-half and vanilla extract. Put the completed custard in the refrigerator overnight. When ready to freeze the custard, strain out the vanilla pods. If you feel like kicking up the cardamom flavor you may add a bit more ground cardamom. Place in ice cream maker and churn according to manufacturer's directions.

Homemade Southern Ice Cream

Eggless Recipe

2 quarts milk
2 cups whipping cream
2 cups granulated sugar
4 tablespoons vanilla extract
4 Junket Tablets (found in your grocery store)

With Eggs

1 quart whipping cream
1 quart plus 3 cups whole milk
12 egg yolks
4 tablespoons vanilla extract
3 cups granulated sugar
2 teaspoons salt

Eggless Recipe: This is the recipe my mom made and believe me there weren't ever any leftovers. Dissolve junket tablets in cold water. Mix milk, sugar and salt and heat to lukewarm. Add water and junket mixture, chill, add cream, vanilla and freeze. Add any fruit you wish if you don't want plain vanilla.

With Eggs: Scald milk in a large 6 quart saucepan. In a large bowl, beat together egg yolks and salt. Add about 3 cups of the hot milk to the egg yolks slowly while stirring constantly. Then return this mixture to the milk in the pan. Add sugar and keep stirring while cooking at medium heat. When mixture coats the spoon or just starts to boil, remove from heat. In most cases, the mix will be lumpy. Don't worry. Just remember to strain out the lumps when you pour it into the canister.

NOTE: You will have lots of left over egg whites. Use them for Baked Alaska, Lemon Milk Sherbet, or make some meringue shells to serve ice cream in.

This is a delicious, catering-quality custard ice cream. Please notice that it uses a ratio of approximately 2 parts milk to 1 part of cream. By substituting additional cream for some of the milk, it can be made even richer.

Ice Cream Cones

2 egg whites
1/2 cup granulated sugar
1/2 cup all-purpose flour, sifted
3 tablespoons melted sweet butter

Fold in remaining sugar, then the flour and butter. Drop spoonful of the mixture onto the cookie sheets and bake in oven preheated to 400 degrees F for about 3 to 4 minutes or until light brown round the edges. Carefully remove from the tray with a spatula and mold around lightly greased funnel molds. Let cool, then carefully slip off the molds.

Makes about 14.

1 square semisweet chocolate, chopped
1/2 cup granulated sugar
1 cup heavy cream

1/3 cup granulated sugar
1/3 cup unsweetened cocoa powder
2 1/2 ounces semisweet chocolate, coarsely chopped

Gradually whisk 1/2 cup chocolate mixture into eggs. Return to saucepan. Stir over medium-low heat until mixture thickens and leaves path on back of spoon when finger is drawn across, 10 to 15 minutes.

Strain into bowl set over larger bowl filled with ice. Cool completely, stirring often.

Stir whiskey into custard. Transfer custard to ice cream maker and freeze according to manufacturer's instructions. Freeze in covered container several hours to mellow flavors. If frozen solid, allow to soften before serving.

In a medium-size heavy-bottomed saucepan, combine milk, cream and 1 tablespoon of the sugar. Bring to a scald.

Meanwhile, put remaining sugar (1/2 cup plus 3 tablespoons), egg yolks and framboise or vanilla extract in a large bowl and whisk just to blend. While gently whisking the yolks, drizzle the hot cream mixture into them so that they are gradually warmed up. Return the mixture to the saucepan and set over medium-low heat. Cook, stirring with a wooden spoon and constantly scraping the bottom of the pan, until the custard has thickened slightly and coats the back of the spoon.

1 (4 ounce) jar maraschino cherries

Blend milk and cherries and their liquid in a blender, only for a moment or two; cherries should not be too well blended.

Marzipan Ice Cream

NOTE: If you can't find vanilla beans, use a high quality vanilla extract.

**1 quart milk
2 cups heavy cream
2 vanilla beans, split in half
1/2 cup granulated sugar
6 large egg yolks, lightly beaten
14 ounces almond paste (marzipan),
cut into 1/4-inch cubes**

In a large heavy saucepan: combine milk, heavy cream, vanilla beans and sugar. Simmer over low heat until the mixture begins to steam (half an hour).

Place beaten egg yolks in a medium bowl. Whisk in a bit of the hot milk mixture. Stir egg/milk mixture back into large saucepan. Continue cooking over low heat, stirring constantly until mixture forms a thin custard (5 to 15 minutes). Remove pan from heat. Scrape the black vanilla seeds inside vanilla beans and mix into custard. Throw away empty vanilla pods. Let the custard cool for 15 minutes.

Fit a food processor with a metal blade. Put diced marzipan into food processor. Add one sixth of the warm custard mixture and pulse until the marzipan softens (4 or 5 times). Add another one sixth and blend until smooth (one minute). Pour marzipan custard mixture into plain custard mixture. Mix well. Pour the mixture into a large pan, or two 9 x 5 x 3-inch pans and freeze the mixture until it is mushy. This will take at least 4 hours, because of the richness of the ice cream.

Empty the ice cream mixture into a large electric mixer bowl, and beat 2 minutes at the highest speed, until fluffy. Pack into a 1/2 gallon plastic freezer container and freeze until semi-firm.

peaches (about 8 large peaches)**
1/4 cup fresh lemon juice
1 1/2 cups heavy cream
1 1/2 cups milk
3/4 cup granulated sugar
3 large egg yolks (at room temperature)

Peel and pit peaches, reserving peach skins and pits. In a food processor or blender, purée peach flesh with the lemon juice. You should have about 2 1/4 cups of purée. Cover and refrigerate.

Place skins and pits in a large saucepan along with the cream and milk. Simmer, covered, over low heat for 20 minutes, being careful not to let mixture boil. It may look slightly separated because of the acid in the fruit. Stir in sugar to dissolve and remove from the heat.

Whisk yolks and add about 1/2 cup of the hot liquid to warm them. Mix well and pour warmed yolks into the hot mixture, stirring constantly. Return saucepan to the heat and cook until custard coats the back of a spoon, about 8 minutes. Be careful not to let mixture boil as it may cause the custard to curdle.

Press a sheet of wax paper or plastic wrap directly onto the surface of the mixture and allow to cool. When cool, strain and combine with the fruit pulp. Mix and chill.

Pour mixture into an ice cream maker and freeze according to manufacturer's directions.

1 cup granulated sugar
3 egg yolks, beaten
2 tablespoons cornstarch
Dash of salt

Mix sugar, egg yolks, cornstarch and salt, adding a little milk to make a smooth paste. Bring 1–quart of milk to boiling point and pour paste in slowly, stirring constantly and cooking only long enough to coat the spoon. Remove from heat, cool and refrigerate until cold.

Raspberry Creamsicles

1 pint raspberries
1/2 cup granulated sugar
1 1/4 cups water
1/2 cup cream (heavy or light)
1 tablespoon lemon juice
1 cup vanilla yogurt
8 (5 ounce) waxy paper cups
8 Popsicle sticks

In a blender, puree 1 pint of the raspberries with the sugar and water. Then use a jelly bag or sieve to strain out the seeds (this should yield about 2 cups of pulp).

Transfer 2/3 cup of the raspberry puree into a separate container, add the cream, and whisk well to mix. Meanwhile, have your child stir the lemon juice into the rest of the raspberry puree. Now you should have two containers of raspberry sauce — one that's deep red and another that's creamy pink. Chill both sauces.

In a bowl, stir together the vanilla yogurt and the remaining raspberries (another good job for kids). Pour the mixture into the paper cups until they are about half full. Set the cups in an 8– inch square pan (for ease in transferring them in and out of the freezer). Cover each cup with aluminum foil and poke a Popsicle stick straight through the center of the foil and into the mixture. Freeze until set (about 2 hours).

Remove the foil and pour a layer of the deep red puree on top of the frozen yogurt. Freeze again until solid (about 2 hours). Finally, pour a layer of the raspberry cream mixture into each cup and freeze until solid.

To serve, peel the cups away from the creamsicles.

Makes 8 creamsicles.

In a food processor bowl process berries till smooth. Press through sieve; discard seeds. Stir berry puree, yogurt, orange peel, and orange juice into gelatin mixture.

Turn into a 2-quart electric ice-cream freezer. Freeze according to manufacturer's directions. (Or, pour into a 9 x 5 x 3-inch pan. Cover; freeze about 6 hours. Break into chunks. 2 tablespoons (yes, tablespoons, not teaspoons!) vanilla extract

Heat cream, milk and sugar in heavy saucepan, stirring until sugar dissolves. Add egg yolks by adding some mixture to eggs to dilute, and then adding diluted eggs to rest of pan (adding straight will cook them and make for lumpy cream).

Whisk constantly over medium heat until mixture coats the back of a spoon (seems to take forever, about 10 minutes?). DO NOT LET BOIL (or it will curdle). Strain, if you want, and add vanilla extract (I never strain, it comes out fine). Cool completely in refrigerator.

Freeze according to manufacturers instructions.
