TO REMOVE STAINS FROM WASHABLES

ALCOHOLIC BEVERAGES

Presoak or sponge fresh stains immediately with cold water, then with cold water and glycerine. Rinse with vinegar for a few seconds if stain remains. These stains may turn brown with age. If wine stain remains, rub with concentrated detergent; wait 15 min.; rinse. Repeat if necessary. Wash with detergent in hottest water safe for fabric.

BLOOD

Presoak in cold or warm water at least 30 minutes. If stain remains, soak in lukewarm ammonia water (3 tablespoons ammonia per gallon water). Rinse. If stain remains, work in detergent, and wash, using bleach safe for fabric.

CANDLE WAX

Use a dull knife to scrape off as much wax as possible. Place fabric between two blotters of facial tissues and press with warm iron. Remove color stain with nonflammable dry cleaning solvent. Wash with detergent in the hottest water safe for fabric.

CHEWING GUM

Rub area with ice, then scrape off with dull blade. Sponge with dry cleaning solvent; allow to air dry. Wash in detergent and hottest water safe for fabric.

Generations of Recipes

CHOCOLATE AND COCOA

Presoak stain in cold or warm water. Wash in hot water with detergent. Remove any grease stains with dry cleaning solvent. If color remains, sponge with hydrogen peroxide, wash again.

CRAYON

Scrape with dull blade. Wash in hottest water safe for fabric, with detergent and 1-2 cups of baking soda.

NOTE: If full load is crayon stained, take to cleaners or coin-op dry cleaning machines.

DEODORANTS

Sponge area with white vinegar. If stain remains, soak with denatured alcohol. Wash with detergent in hottest water safe for fabric.

DYE

If dye transfers from a non-colorfast item during washing, immediately bleach discolored items. Repeat as necessary BEFORE drying. On whites use color remover. CAUTION: Do not use color remover in washer, or around washer and dryer as it may damage the finish.

EGG

Scrape with dull blade. Presoak in cold or warm water for at least 30 minutes. Remove grease with dry cleaning solvent. Wash in hottest water safe for fabric, with detergent.

FRUIT AND FRUIT JUICES

Sponge with cold water. Presoak in cold or warm water for at least 30 minutes. Wash with detergent and bleach safe for fabric.

Pour denatured alcohol through stain. Rub in petroleum jelly. Sponge with nonflammable dry cleaning solvent. Soak in detergent solution. Wash with detergent and bleach safe for fabric.

INK - FOUNTAIN PEN

Run cold water through stain until no more color will come out. Rub in lemon juice and detergent. Let stand 5 minutes. Wash.

If a yellow stain remains, use a commercial rust remover or oxalic acid, as for rust stains.

CAUTION: HANDLE POISONOUS RUST REMOVERS CAREFULLY. KEEP OUT OF REACH OF CHILDREN. NEVER USE OXALIC ACID OR ANY RUST REMOVER AROUND WASHER AND DRYER AS IT CAN DAMAGE THE FINISH. SUCH CHEMICALS MAY ALSO REMOVE PERMANENT PRESS FABRIC FINISHES.

LIPSTICK

Loosen stain with a nonflammable dry cleaning solvent. Rub detergent in until stain outline is gone. Wash in hottest water and detergent safe for fabric.

Generations of Recipes

CAUTION: HANDLE POISONOUS RUST REMOVERS CAREFULLY. KEEP OUT OF REACH OF CHILDREN. NEVER USE OXALIC ACID OR ANY RUST REMOVER AROUND WASHER OR DRYER AS IT CAN DAMAGE THE FINISH. SUCH CHEMICALS MAY ALSO REMOVE PERMANENT PRESS FABRIC FINISHES.

SCORCH

Wash with detergent and bleach safe for fabric. On heavier scorching, cover stain with cloth dampened with hydrogen peroxide. Cover this with dry cloth and press with hot iron. Rinse well.

CAUTION: Severe scorching cannot be removed because of fabric damage.

SOFT DRINKS

Sponge immediately with cold water and alcohol. Heat and detergent may set stain.

TEA

Sponge or soak with cold water as soon as possible. Wash using detergent and bleach safe for fabric.

FIRST AID IN HOUSEHOLD EMERGENCIES

POISONING: When a poison has been taken internally, start first aid at once. Call doctor immediately.

Dilute poison with large amounts of liquids - milk or water.

Wash out by inducing vomiting, when not a strong acid, strong alkali or petroleum.

For acid poisons do not induce vomiting, but neutralize with milk of magnesia. Then give milk, olive oil or egg white. Keep victim warm and lying down.

For alkali poisons such as lye or ammonia, do not induce vomiting.

Give lemon juice or vinegar. Then give milk and keep victim warm and lying down.

If poison is a sleeping drug, induce vomiting and then give strong black coffee frequently. Victim must be kept awake.

If breathing stops, give artificial respiration.

SHOCK: is brought on by a sudden or severe physical injury or emotional disturbance. In shock, the balance between the nervous system and the blood vessels is upset. The results is faintness, nausea, and a pale and clammy skin. Call ambulance immediately. If not treated the victim may become unconscious and eventually lapse into a coma.

Keep victim lying down, preferably with head lower than body.

Don't give fluids unless delayed in getting to doctor, then give only water. (Hot tea, coffee, milk or broth may be tried if water is not tolerated.)

Never give liquid to an unconscious person. Patient must be alert.

Cover victim both under and around body.

Do not permit victim to become abnormally hot.

Reassure victim and avoid letting him see other victims, or his own injury.

Fainting is most common and last form of shock. Patient will respond in 30-60 seconds by merely allowing patient to lie head down if possible on floor.

Generations of Recipes

FRACTURES: Pain, deformity or swelling of injured part usually means a fracture. If fracture is suspected, don't move person unless absolutely necessary, and then only if the suspected area is splinted. Give small amounts of lukewarm fluids and treat for shock.

BURNS: Apply or submerge the burned area in cold water. Apply a protective dry sterile cloth or gauze dry dressing if necessary. Do not apply grease or an antiseptic ointment or spray. Call doctor and keep patient warm (not hot) with severe burns.

If burn case must be transported any distance, cover burns with clean cloth.

Don't dress extensive facial burns. (It may hinder early plastic surgery.)

WOUNDS: Minor Cuts - Apply pressure with sterile gauze until bleeding stops. Use antiseptic recommended by your doctor. Bandage with sterile gauze. See your doctor. Puncture Wounds - Cover with sterile gauze and consult doctor immediately. Serious infection can arise unless properly treated.

ANIMAL BITES: Wash wounds freely with soap and water. Hold under running tap for several minutes if possible. Apply an antiseptic approved by your doctor and cover with sterile gauze compress. Always see your doctor immediately. So that animal may be held in quarantine, obtain name and address of owner.

HEAT EXHAUSTION: Caused by exposure to heat or sun.

Symptoms: Pale face, moist and clammy skin, weak pulse subnormal temperature, victim usually conscious.

Treatment: Keep victim lying down, legs elevated, victim wrapped in blanket. Give salt water to drink (1 tsp. salt to 1 glass water) ½ glass every 15 minutes.

GENERAL DIRECTIONS FOR FIRST AID

1. Effect a prompt rescue.
2. Maintain an open airway.
3. Control severe bleeding by direct pressure over bleeding site. No tourniquet.
4. Give First Aid for poisoning.
5. Do not move victim unless it is necessary for safety reasons.
6. Protect the victim from unnecessary manipulation and disturbance.
7. Avoid or overcome chilling by using blankets or covers, if available.
8. Determine the injuries or cause for sudden illness.
9. Examine the victim methodically but be guided by the kind of accident or sudden illness and the need of the situation.
10. Carry out the indicated First Aid.

TRY SAYING "GOOD MORNING" AS THOUGH YOU REALLY MEANT IT

Then (tomorrow, say) try treating some teenager like an adult.

Find someone to praise for doing a good job namely: waitress, bus driver, newsboy, store clerk, anyone.

Show respect for an older person's experience (or fortitude).

Be patient with someone who doesn't understand as quickly as you do.

Write or phone someone having a difficult time. Say you know it's rough, but you have faith in them.

Look pleasant.

Do your job a little better. Maybe you'll get some praise, but certainly you'll get more satisfaction.

Help someone namely: a handicapped across a street, a young man or woman looking for a job (whether you can give it or not, give them hope) or an older one, discouraged in themselves.

Contribute to some church or charity namely: money if you can, time if you can't.

It just could be that this sort of understanding is what this country needs right now.

Try it tomorrow - all day tomorrow. You might be surprised!

WORTH REMEMBERING

Keep a toothbrush around the kitchen sink - you will find it useful in cleaning rotary beaters, graters, choppers and similar kitchen utensils.

Instead of trying to iron rickrack on the right side of the garment, turn the article. The rickrack can be pressed perfectly.

When your hands are badly stained from gardening, add a teaspoon of sugar to the soapy lather you wash them in.

Use paper cups as handy containers for your "drippings" in the refrigerator as they take up little room and can be thrown away when empty.

Before emptying the bay of your vacuum cleaner, sprinkle water on the newspaper into which it is emptied, and there will be no scattering of dust.

To whiten laces, wash them in sour milk.

To remove burned-on starch from your iron, sprinkle salt on a sheet of waxed paper and slide iron back and forth several times. Then polish it with silver polish until roughness or stain is removed.

Dip a new broom in hot salt water before using. This will toughen the bristles and make it last longer.

Dryer Sheet pinned to clothes works as a mosquito repellent.

Try waxing your ashtrays. Ashes won't cling, odors won't linger and they can be wiped clean with a paper towel or disposable tissue. This saves daily washing.

Plant a few sprigs of dill near your tomato plants to prevent tomato worms on your plants.

Marigolds will prevent rodents.

Spray garbage sacks with ammonia to prevent dogs from tearing the bags before picked up.

You can clean darkened aluminum pans easily by boiling in them two teaspoons of cream of tartar mixed in a quart of water. Ten minutes will do it.

Fresh lemon juice will take onion scent from hands.

Wash old powder puffs in soapy water, rinse well and dry thor-

Generations of Recipes

oughly. Then use them for polishing silverware, copper and brass.

Soak colored cottons overnight in strong salt water and they will not fade.

To dry drip-dry garments faster and with fewer wrinkles, hang garment over the top of a dry cleaner's plastic bag.

If a cracked dish is boiled for 45 minutes in sweet milk, the crack will be so welded together that it will hardly be visible and will be so strong it will stand the same usage as before.

SALAD AND SALAD DRESSINGS

For Appeal To The Appetite

Chill ingredients before mixing - except for molded salads.

Provide tartness in the body of salad or dressing.

Use salad greens other than lettuce sometimes. Have you tried chicory, escarole, endive, kale, spinach, dandelion greens, romaine, watercress, and Chinese cabbage?

Sprinkle orange, lemon, lime, or pineapple juice on fruits that may turn dark - apples, peaches, and bananas, for instance.

For tossed green salads, tear greens in fairly large pieces or cut with scissors. Larger pieces give more body to the salad.

Prevent wilting and sogginess by drying the greens used in salads, draining canned foods well before adding to salad, using just enough salad dressing to moisten. For raw vegetable salads, add dressing at the last minute.

Fruit Combinations

1. Sliced pineapple, apricot halves, sweet red cherries.
2. Watermelon balls, peach slices, orange slices.
3. Grapefruit sections, banana slices, berries or cherries.
4. Grapefruit sections, pared apple slices.
5. Peach slices, pear slices, halves of red plums.
6. Pineapple wedges, banana slices, strawberries.
7. Cooked dried fruit, white cherries, red raspberries.

Fruit and Vegetable Combinations

1. Shredded raw carrots, diced apples, raisins.
2. Sliced or ground cranberries, diced celery and apples, orange sections.
3. Thin cucumber slices, pineapple cubes.
4. Avocado and grapefruit sections, tomato slices.
5. Shredded cabbage, orange sections, crushed pineapple.

Vegetable Combinations

1. Grated carrots, diced celery, cucumber slices.
2. Spinach, endive, or lettuce, with tomato wedges.
3. Sliced raw cauliflower florets, chopped green pepper, celery, pimento.
4. Shredded cabbage, cucumber cubes, slivers of celery.
5. Cubed cooked beets, thinly sliced celery, sweet onions.
6. Cooked whole-kernel corn and shredded snap beans, sweet pickles, onion rings.

TIPS TO THE CARVER

Convention doesn't forbid your standing up to carve, so, if it's easier, stand up.

The bones get in your way if you don't know where to expect them; a little investigation tells you just where they are.

Carving is unduly complicated by a dull knife.

And remember the first rule of carving...

"Cut across the grain"

If you cut with the grain, long meat fibers give a stringy texture to the slice. Steaks are the exception.

TIPS TO THE HOSTESS

A large roast can be carved more easily after it stands for about thirty minutes.

When garnishing, don't be overgenerous; leave space for the work to be done.

Servings cool quickly so plates and platter must be heated.

An inexperienced carver will appreciate a hostess who keeps the guests' attention diverted from the carving.

HOW TO CARVE TURKEY

1. Remove leg; Hold drumstick firmly, pulling gently away from body. Cut skin between leg and body. Press leg downward and cut from body. Separate drumstick, thigh; slice meat from each piece.
2. Cut into white meat parallel to wing, making a cut deep into the breast to the body frame, as close to the wing as possible.
3. Slice white meat. Beginning at front starting half way up breast, cut thin slices of white meat down to the cut. Continue until enough meat has been carved for first servings. Carve more as needed.

KITCHEN IDEAS

To preserve leftover egg yolks for future use, place them into a small bowl and add two tablespoons of salad oil. Then put into refrigerator. The egg yolks will remain soft and fresh, and egg yolks kept in this way can be used in many ways.

You may determine the age of an egg by placing it in the bottom of a bowl of cold water. If it lays on its side, it is strictly fresh. If it stands at an angle it is at least three days old and ten days old if it stands on end.

To keep egg yolks from crumbling when slicing hard-cooked eggs, wet the knife before each cut.

Bread crumbs added to scrambled eggs will improve the flavor and make larger helpings possible.

A tablespoon of vinegar added to the water when poaching eggs will help set the whites so they will not spread.

Generations of Recipes

When cooking eggs it helps prevent cracking if you wet the shells in cold water before placing them in boiling water.

Add a little vinegar to the water when an egg cracks during boiling. It will help seal the egg.

Meringue will not shrink if you spread it on the pie so that it touches the crust on each side and bake it in a moderate oven.

When you cook eggs in the shell, put a big teaspoon of salt in the water. Then the shell won't crack.

Set eggs in pan of warm water before using as this releases all white from shells.

Egg whites for meringue should be set out to room temperature before beating, then they can be beaten to greater volume.

If you want to make a pecan pie and haven't any nuts, substitute crushed cornflakes. They will rise to the top the same as nuts and give a delicious flavor and crunchy surface.

To prevent crust from becoming soggy with cream pie, sprinkle crust with powdered sugar.

Cut drinking straws into short lengths and insert through slits in pie crusts to prevent juice from running over in the oven and permit steam to escape.

Put a layer of marshmallows in the bottom of a pumpkin pie, then add the filling. You will have a nice topping as the marshmallow will come to the top.

If the juice from your apple pie runs over in the oven, shake some salt on it, which causes the juice to burn to a crisp so it can be removed.

Use cooking or salad oil in waffles and hot cakes in the place of shortening. No extra pan or bowl to melt the shortening and no waiting.

Add salt to eggs and beat until thick and lemon colored. Add sugar and flavoring and continue to beat. Add sour cream and flour alternately mixing well after each addition. Knead on floured board. Cut small pieces of dough, roll very thin and cut into strips about 4 inches long. Slit each piece in center and pull through the slit. Fry in hot fat until lightly browned.
